### **DETAILED ACTION**

1. This Office Action is made in response to applicant's amendment after final filed on 3/26/09. Claims 1-5 and 8-12 are currently pending in the application. An action follows below:

#### ***Allowable Subject Matter***

2. Claims 1-5 and 8-12 are allowed.

The following is an examiner's statement of reasons for allowance:

The present invention is directed to a method of adjusting the scanning frequency and phase of an analog-to-digital converter for use with a display device. Each independent claim identifies the uniquely distinct features increasing the scanning phase to determine a first boundary value, resetting the phase and then decreasing the phase to determine a second boundary and adjusting the scanning phase based on the average value of the first and second boundary values. The closest prior art, Naka et al. (USPN: 5990968), Lee (USPN: 6597370), and Choi (USPN: 6404422) disclose methods of adjusting the phase of the scanning signal including either increasing or decreasing the phase to determine an optimum level, but fail to determine the correct phase based on an average of two boundary readings, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2629

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
